No Cost Heat Trace Design Services

Saving energy has everybody talking these days. When designing a new heat trace system, how do you know that you're hitting the sweet spot of sufficient freeze protection without excess energy usage? Can the supplier deliver on time and be cost effective for both small and large projects? When it comes to installation support, will you be left out in the cold?

Put Your Worries to Rest

No cost design services for heat trace projects are available to you through Jasper Engineering & Equipment Co. We'll size the system correctly the first time and give you a comprehensive bill of materials. Right sizing is a win-win: you will have a system that works without excessive energy demands.

When You Need It Now

Availability when you need it most is assured with Jasper's substantial local inventory in Minnesota backed up by Thermon's factory stock in Texas.

Installation Made Easy

We are committed to supporting your success with local training. Thermon Manufacturing also offers a wide range of videos and an easy to reference Contractor's Handbook. Get yours today for free from Jasper Engineering.

Jasper Engineering & Equipment Company - Your Trusted Partner

Since 1958, Jasper Engineering has been known as the premier industrial manufacturer's representative in the Upper Midwest. Today we proudly serve manufacturers and engineers in Minnesota, Wisconsin, Upper Michigan, Iowa, Nebraska, North Dakota, South Dakota, and Montana with solutions for process instrumentation, analyzers, heat trace, and valves.

Thermon holds a unique position as the only international heat tracing company completely dedicated to its industry. Since 1954, Thermon has concentrated its efforts exclusively on heat tracing, the external application of heat to pipes, tanks and instrumentation.
